PROACTIVE
MEDICAL REVIEW

Speakers

Amie Martin is an Occupational Therapist with twenty years' experience serving in long term care leadership and as a clinical program specialist. She is certified in health care compliance and has successfully partnered with providers to improve clinical outcomes, compliance programs, medical record documentation and to reduce error rates under medical review.

Shelly Maffia is a Registered Nurse and Nursing Home Administrator who has served in long term care leadership and consulting positions, including Director of Nursing, Administrator and Corporate Nurse Consultant. She earned the QAPI Certified Professional (QCP) credential from the American Association of Nurse Assessment Coordination (AANAC), which was established to promote the highest standards for QAPI program implementation in the long term care profession.

Driving 5-Star & RoP Implementation Through a QAPI Approach

Proactive Medical Review & Consulting assists post-acute care providers in ensuring compliance with regulatory standards and promoting measurable care excellence. Proactive specializes in SNF risk assessment, Quality Assurance Performance Improvement (QAPI) projects, medical record review services and staff development to promote care quality and effective clinical documentation. Proactive offers consulting for Medical Review and Medicare appeals and is uniquely positioned to assist SNF providers with therapy oversight and the defense of skilled rehab services through their team that includes therapist consultants, nurses, administrators, MDS and SNF/NF billing experts.

Increase in ADL Help, Ability to Move Independently Worsened & Improvement in Function: Analyzing 5-Star Functional Mobility QMs & Applying QAPI Principles to Improve Functional Mobility QMs

October 11, 2017

9—10:15 a.m.

This session will review the increase in ADL help, the ability to move independently worsened and improvement in function quality measures that impact the Quality Measure component of the Nursing Home Compare 5-Star Quality Rating system. During the session, we will review how these measures are calculated and how they impact your overall 5-Star Quality Rating. The session will focus on best practices for reducing and preventing decline in ADL status and improving this quality measure using a QAPI framework with emphasis on reduction of common MDS coding errors and implementation of a facility specific 5-Star road map action plan. Sample tools will be shared for driving and sustaining 5-Star Quality.

At the conclusion of this session participants should be able to:

- Describe how the increased need in ADL help, ability to move independently worsened, and improvement in function quality measures are calculated and impact the 5-Star Quality Rating score
- Describe best practices for improving and monitoring your quality measures in the area of increased need for ADL help, ability to move independently worsened, and improvement in function and impacting 5-Star Quality Rating score
- Describe a process for establishing priority QAPI goals and actions to improve communication of changes in ADL status

Continuing Education

Illinois nursing home administrators, social workers, physical therapists/physical therapy assistants and licensed nurses will earn 1.25 clock hours of continuing education for participating in this session. The Illinois Health Care Association is approved as a sponsor of continuing education for nursing home administrators, social workers, physical therapists/physical therapy assistants and licensed nurses by the Illinois Department of Financial and Professional Regulation.

This session has also been submitted for NAB approval for administrators and nurses.
