December 7, 2015

Q: If a resident moved in 2010 and initial OBRA was done, then she went to our SLF on 9/15/15 and then came back to SNF on 10/13/15, can we use the initial OBRA? Or should she have had a new one?

A: As long as the resident is going back and forth from facility to facility. A new screening is not needed. Use the info from the initial screening. When the facility enters the admit into MEDI (click here), they need to indicate in the remarks field that this was a facility to facility transfer, new screening is not needed.
