Q: If a facility wanted to re-number the resident rooms (no structural changes), does IDPH need to be notified?

A: Yes, they do as their entire license is built upon room numbers as well as the certification status of rooms. What IDPH needs is a list of how the rooms are numbered now and what they will be after the change etc... They can just take a Room/Bed/Level of Care form that IDPH sends them every year and write in the new room numbers next to the old room numbers, and send it to IDPH to the attention of Paul Corpstein in the Licensure Section.
